

AAE 535 Spring 2024

Propulsion Design, Build, & Test

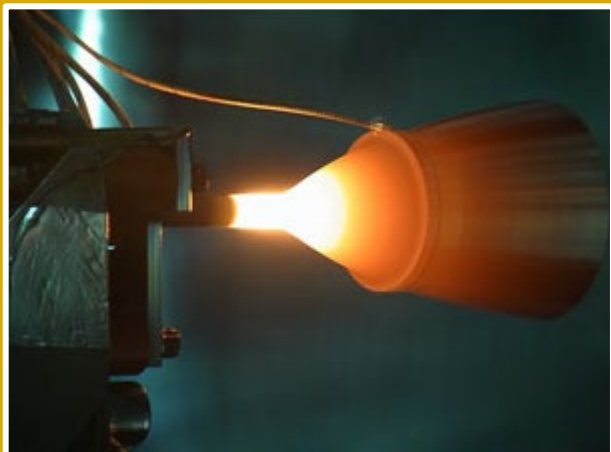

Are you passionate about space missions and are you:

An AAE propulsion major interested in hypergolic propellants?

An MSE student interested in high-temperature transparent materials?

An AAE design major interested in project-driven design processes?

Then enroll in AAE 535 for Spring 2024!

<https://www.ihl.co.jp/ia/en/products/space/thruster/index.html>

THE MISSION: Two teams have one semester to design the most optically accessible 5lbf thruster possible, aiming for a one second test fire using MMH/MON
